Longevity & Youthfulness

The New

LONGEVINEX® FOR LIFE

*Now With L-Theanine
- Nature's Stress Blocker**

*Supports Stem Cell Regeneration For The Eyes, Heart & Brain
Promotes Survival Of Internally-Produced Stem Cells**

ADVANTAGE MATRIX

In addition to your best source of trans-resveratrol (the active form of resveratrol) & a potent anti-aging nutrient on its own - patented Advantage matrix also features:

NEW!

L-Theanine - nature's stress blocker; balances stimulant effects of caffeine, as L-TeaActive™* resveratrol; improves mental alertness*

Hyaluronan stimulates fibroblasts to make more of this gel-like water-holding molecule for youthful skin, eyes, hair, joint lubrication*

Lutein/Zeaxanthin carotenoid anti-oxidant for youthful skin, eyes*

Quercetin permits instant availability of resveratrol*

Rice bran phytate nature's mineral chelator, calcification dissolver*

Thiamin (vitamin B1) promotes youthful looking hair, physiological pH balance, optimal sugar metabolism and brain/nerve function*

Vitamin D3 works synergistically with resveratrol, which sensitizes vitamin D cell entry (receptor) site*

Important things to know about taking ADVANTAGE™

- ✓ Ingredients in Longevinex® heighten the effects of drugs and should be taken 2-4 hours apart from medications.
- ✓ Ingredients in Longevinex® safely inhibit blood clotting but can be taken with blood thinning drugs if not taken at the same time.
- ✓ Do not use if anemic - symptoms might include cold fingers and toes, leg kicking in bed (nocturnal leg cramps), shortness of breath when climbing stairs, behind-the-eye or forehead headache.
- ✓ Longevinex® is not recommended for growing children, pregnant or menstruating females who tend to be anemic and have high need for minerals.
- ✓ Excessively-high doses have been reported to cause Achilles heel tendinitis/soreness (induced by copper shortage; copper is best acquired from the diet in nuts and cocoa powder).
- ✓ Store in a cool, dry place (not refrigerator).
- ✓ You can open the capsule and mix with cool beverage if you have difficulty swallowing pills. Tomato or pineapple juice will mask the bitter taste.
- ✓ When consuming with a meal, take at a different time than vitamin C for optimal mineral chelating effect. Can take with vitamin C between meals.
- ✓ Preferably consume with food to avoid stomach upset.
- ✓ Do not exceed recommended serving size (dosage). More does not work better.
- ✓ If you experience heart palpitations, skin rash, visual decline or anxiety, cease taking. People under great mental stress (high adrenaline levels) may be more prone to these reactions.

ADVANTAGE⁺

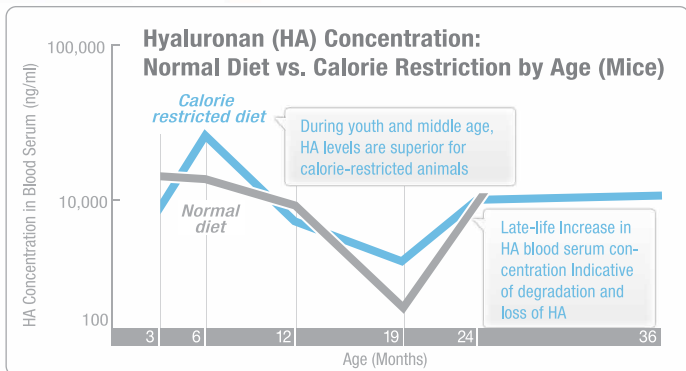

LONGEVINEX[®] (FOR LIFE)[®]

Longevinex Advantage™ has been reformulated to provide two new youthful molecules - **hyaluronan (HA)** and **L-Theanine**.

Hyaluronan is the water-holding, moisturizing molecule of the human body. Molecules that inhibit the breakdown of HA are also provided.

L-Theanine is “nature’s stress blocker” that balances the biological effects of resveratrol and calms stimulants like caffeine to produce mental alertness and to facilitate stress hormone (adrenaline) control.

Estrogen stimulates the body’s production of Hyaluronan in woman, giving them thicker hair, smoother skin, and more flexible joints. The onset of menopause results in reduced HA levels and thinning hair, wrinkled skin and stiff joints. Oral HA supplementation stimulates youthful levels of HA in the body without the need for estrogen replacement.

Reference: Circulating hyaluronan levels in the rodent: effects of age and diet. Am J.Physiol. 268: C952-57, 1995

HYALURONAN

Is the Molecule of Youthful Appearance

Hyaluronan & Resveratrol may prove to be the most important one-two punch against the effects of aging. First, calorie restriction has been shown to be a life extender. In studies, Resveratrol (Longevinex[®] brand in particular) is able to “convince” an organism it is in a calorie restricted, less aged state. Late in life, HA — a core constituent of well-cushioned joints and smooth skin — is reduced. Supplementing with oral hyaluronan both directly stimulates youthful HA production and re-programs the body to hold on to HA, as it does easily when younger.

Oral Absorption: A common misconception is that oral hyaluronan cannot be absorbed since it’s a large molecule. The truth is, stomach acids and enzymes (hyaluronidase) break down HA into smaller molecules. Studies show oral HA is absorbed in animals and humans and produces beneficial results.

Oral absorption of hyaluronic acid and phospholipid complexes in rats. World J Gastroenterol. 2007 Feb 14; 13(6): 945-9; Degradation of chondroitin 2-sulfate by rat stomach exoglycosidases, sulfohydrolase and hyaluronidase-like enzymes. Digestion 21(3): 117-24, 1981
